Faizan Bapu

Gujarat, India | 9104079808 | patelfaizan9509@gmail.com | LinkedIn | GitHub

SUMMARY

Top performer with a CGPA of 8.83, skilled in full-stack development. Built production-quality projects from scratch - a multi-dimensional Power BI sales dashboard and a full-stack student management system with authentication and database integration. Comfortable with AI & low-code technologies Power Platform, Copilot Studio, Claude. Quick learner who picks up new tools independently and gets things done.

EDUCATION

Sardar Vallabh Bhai Patel Institute of Technology, Vadodara
Bachelor of Science in Information Technology (BSc IT)
CGPA: 8.83 / 10
Relevant Courses: Data Structures & Algorithms, OOP, Database Design, Systems Design, Full-Stack Development, Cloud Computing, Agile Project Management

Matliwala Public School
Higher Secondary Certificate (Science Stream)

TECHNICAL SKILLS

Languages: Java, PHP, JavaScript, C / C++, PL/SQL, Python
Data & Analytics: SQL, MySQL, Power BI, DAX, Excel (VLOOKUP, Pivot Tables), DBMS, Data Structures
Frameworks & Libraries: Bootstrap, responsive web design
Tools & Platforms: Git, GitHub, VS Code, Microsoft Excel, Microsoft Office
Concepts: CRUD operations, user authentication, database design, data visualization, version control

PROJECTS

Sales Performance Dashboard | *Power BI, DAX, Data Modeling, KPIs*

- Designed and built an interactive Power BI dashboard tracking monthly revenue, top-performing products, and regional sales trends - replacing manual Excel reporting with a self-service analytics tool.
- Wrote DAX measures and calculated columns to enable dynamic period-over-period comparisons, filtering, and drill-down analysis across multiple dimensions.
- Implemented KPI cards, bar charts, slicers, and map visualizations to communicate sales performance clearly to non-technical stakeholders.
- Applied data modeling best practices including star schema design and relationship management across multiple data tables.

Student Management System | *PHP, MySQL, Bootstrap, JavaScript, Git, GitHub*

- Built a full-stack Student Management System from scratch: designed the relational database schema, implemented PHP backend logic, and developed a responsive Bootstrap frontend.
- Implemented complete CRUD operations with parameterized MySQL queries to prevent SQL injection, covering student records, enrollment, and academic data.
- Added secure user authentication including session management, login/logout, and role-based access control to restrict admin features.
- Delivered a searchable, paginated student listing dashboard with filtering and inline editing features.
- Managed the entire project using Git and GitHub - including branching, commits, and a clean repository structure ready for team collaboration.

Nova AI — Your Intelligent Companion | PHP, JavaScript, HTML, CSS, MySQL, Google Gemini API

- Built a web-based AI assistant using the Google Gemini API, with PHP handling backend requests and AI integration.
- Implemented user authentication, MySQL database integration, chat history, and formatted AI responses.
- Developed the frontend using HTML, CSS, and JavaScript with a responsive interface for interacting with the AI assistant.

CERTIFICATIONS

- Data Analysis using SQL: Hands-on SQL querying, aggregations, joins, and analytical functions
- Power BI - Data Visualization and Reporting: Dashboard design, DAX, data modeling

- Microsoft Excel for Data Analysis: Pivot tables, VLOOKUP, data cleaning, charting
